BARLOW**

The Garvan Global Genomics *Report*

2018

Contents

1. Executive Summary	1
1. Dawn of the Genomics Era	13
1.1 A Short History of Genomics	13
1.2 Technological Take-Off	17
1.3 Scientific Foundations	22
1.4 Socioeconomic Developments	27
1.5 The Genomics Era	30
2. Analytical Approach	32
2.1 Defining Genomic Medicine & Health	32
2.2 Clarivate Analytics Datasets	34
2.3 Search Methodologies	37
2.4 A Decade of Change	43
2.5 Language & Referencing Conventions	45
3. A Fast-moving Frontier	47
3.1 Genomic Uptake in Medicine	47
3.2 Whole-genome & Personalized Sequencing	51
3.3 An Early Stage, Cross-sectoral Technology	55
3.4 New Business Models	61
4. Disease Focus	72
4.1 Disease Focus in the Scientific Literature	72
4.2 Conditions Targeted in Clinical Trials	82
4.3 Indications Reported in Patent Applications	90
4.4 Conclusions	98
5. Technological Trends	102
5.1 Sequencing Costs	102
5.2 Interpretation Technologies	107
5.3 Associated Biomedical Technologies	115
5.4 DNA versus RNA	122
6. Applications	126
6.1 Indications of Changing Practice	126
6.2 Diagnostic Products & Services	133
6.3 Lifestyle & Wellness Services	142
6.4 Therapeutic Products & Services	151
6.5 Sequencing Services	161
6.6 General Trends	167
7. Leading Research Organizations	170
7.1 Genomic Science Research Institutes	170
7.2 Institutes Involved in Genomic Trials	179
7.3 Institutes Partnering with Pharmaceutical Companies	184
7.4 Collaborations and Alliances	190
8. Genomic Disruption	196
8.1 Business Opportunities	196
8.2 Business Risks	201
8.3 The Future	208
8.4 Genomic Disruption	213
References	215
Appendices	219
Author Biography	226
